DETAILED ACTION

Response to Amendment

1. Applicants' amendments and arguments, see amendment, filed on 8/30/2004, with respect to Claims 1-27 have been fully considered and are persuasive. The 35U.S.C.102/112 rejections have been withdrawn. None of the previously cited reference teaches the Claims 1-27.

Allowable Subject Matter

2. Claims 1-27 are allowed.

Examiner's Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:
The prior art along or in combination fails to teach or make obvious the limitations for a method and system for device addressing over a computer network that specifically comprises:

"the method includes inhibiting reading of a further data block from said stream when, in the absence of a vacancy for data of said second elementary stream within the target decoder model, a clock reference of said input data stream advances beyond a clock reference of said output data stream by a predetermined waiting threshold." as recited in the independent claim 1, and

"said data is read on demand from an input channel and the reading of said data is constrained by reference to progress in re-multiplexing of the second elementary stream irrespective of a vacancy for data of the first stream in the second target decoder model, provided that said reading is judged sufficiently far in advance of the progress in re-multiplexing the second elementary stream to compensate for differences in the first and second target decoder models" as recited in the independent claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
